

THANUJA KALLA

BUSINESS ANALYST | SAP ANALYTICS CLOUD CONSULTANT | POWER BI DEVELOPER
kallathanuja027@gmail.com | (214) 470-6000 | St. Louis, MO | LinkedIn: [add URL] | Portfolio: In Progress

PROFESSIONAL SUMMARY

Analytics professional with hands-on experience in SAP Analytics Cloud (SAC), SAP Datasphere, Power BI, SQL, Excel, data modeling, dashboard development, and KPI reporting. Skilled in translating stakeholder requirements into scalable data models, interactive SAC stories, and decision-ready business reports.

CORE COMPETENCIES

Business Requirements Gathering | SAP SAC Story Development | SAP Datasphere Modeling | Power BI Dashboards | Data Modeling | KPI Reporting | Data Validation | Root-Cause Analysis | Process Improvement | Stakeholder Communication | UAT | Report Automation

PROFESSIONAL EXPERIENCE

Business Intelligence / SAP Analytics Intern | [Company Name] **[Month Year] - Present**

[City, State / Remote]

- Develop end-to-end SAP Analytics Cloud solutions, from source analysis and SAP Datasphere modeling through KPI definition, story creation, validation, and stakeholder delivery.
- Build analytical and semantic models in SAP Datasphere and prepare business-ready datasets for reporting and visualization in SAP Analytics Cloud.
- Create interactive SAC stories using charts, tables, filters, input controls, linked analysis, calculated measures, and drill-down functionality.
- Gather business and reporting requirements, translate them into functional specifications, and refine dashboards through stakeholder feedback.
- Validate model outputs against source data, troubleshoot data and reporting issues, support user acceptance testing, and document solution logic and workflows.
- Deliver stakeholder walkthroughs and user guidance to improve adoption of dashboards and self-service analytics solutions.

Quality Specialist | Amazon **Sep 2023 - Jun 2024**

Hyderabad, India

- Analyzed operational and quality data to identify trends, process gaps, and improvement opportunities across address-related workflows.
- Tracked quality scores, error rates, productivity metrics, and SLA compliance; produced weekly and monthly performance reports for management.
- Conducted root-cause analysis and supported corrective actions that reduced address-related defects by 20%.
- Improved Excel-based data validation and reporting workflows by 30% and earned Amazon LMAQ Top Performer recognition six times.

SELECTED BUSINESS INTELLIGENCE PROJECT

Community Health Equity and Social Needs Tracker | Saint Louis University **Academic Project**

St. Louis, MO

- Integrated healthcare and social-needs data and designed KPI dashboards covering costs, demographic trends, disease prevalence, and geographic risk.
- Used SQL and Python for transformation and validation and translated findings into recommendations for outreach and resource allocation.
